

Supplement your energy rebate up to \$500!

Viessmann Manufacturing Company (U.S.) Inc. is pleased to offer U.S. homeowner rebates up to a maximum of \$500* for the difference between the available energy utility rebate for boilers with AFUE >95% and the rebate amount the Vitodens 200 boiler qualifies for following recent AFUE rating updates. This offer applies to Vitodens 200 residential boilers installed between March 11 and December 31, 2013.

How to claim your Rebate Supplement:

Step 1: Apply for your energy supplier's rebate following boiler installation.

Step 2: Once you have received your energy supplier rebate, apply for the Viessmann Rebate Supplement by submitting the following to Viessmann Manufacturing Company (U.S.) Inc.:

- Rebate Supplement form
- Copy of installing contractor's invoice
- Proof of amount received from energy supplier rebate
- Details of energy supplier's rebate program

Step 3: Viessmann will verify your submission and issue a Rebate Supplement check by mail.

* Supplemental Rebate available for the purchase and installation of Viessmann Vitodens 200 models WB2B 19, 26, 35, 45, 60, 80 only. Supplemental Rebate amount varies and is dependent on difference between utility's maximum applicable rebate for AFUE >95% and rebates for boilers with lower AFUE. A copy of installing contractor invoice, proof of amount received through energy supplier rebate, and details of utility's rebate program must accompany Supplemental Rebate application form. This rebate is valid for installations between March 11 and December 31, 2013, and must be submitted by January 31, 2014. Cannot be combined with any other offer. For U.S. homeowners only.
